

Enabling Run as service on HotView Pro™ on Windows OS

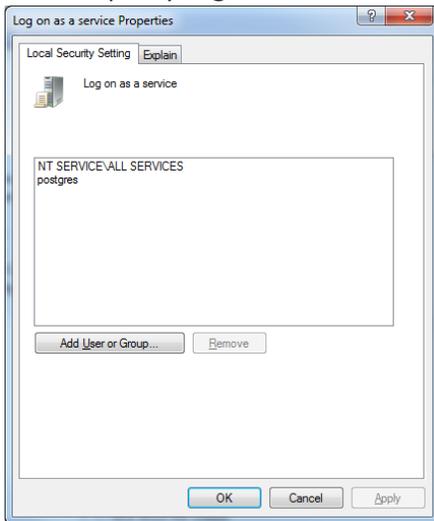

CONTENTS

1	Adding a User to the Log on as a service policy	2
2	Verify that the service has Started	3
3	Setup Run as service in HotView Pro	3
4	Troubleshooting	4

1 ADDING A USER TO THE **LOG ON AS A SERVICE** POLICY

1. Open the **Run** dialog box (Windows Logo+R)
Type **secpol.msc** and **Enter**↵
OR
Open **Control Panel** (Icon view) → **Administrative Tools** → **Local Security Policy**
Open **Control Panel** (Category view) → **System and Security** → **Administrative Tools** → **Local Security Policy**
2. In the console tree, double-click **Local Policies**, and then click **User Rights Assignment**.
3. Find the policy **Log on as a service**, double-click to open.

4. Click **Add User or Group...**, and then enter the **Windows login username** in the **Enter the object names to select...** field.
 - a. **Note:** Do not use a profile that contains a Domain name.
2. Click the **Check Names** to verify validity and then click **OK**.
3. Click **Apply** and then **OK** to close the **Log on as a service Properties** window.

2 VERIFY THAT THE SERVICE HAS STARTED

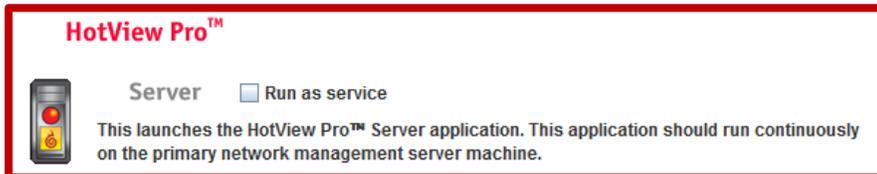

1. Open the **Run** dialog box (Windows Logo+R)
Type **services.msc** and **Enter**↵
OR
Open **Control Panel** (Icon view) → **Administrative Tools** → **Services**
Open **Control Panel** (Category view) → **System and Security** → **Administrative Tools** → **Services**
2. Find the **Firetide MRM Service...** service. The status will be **Started**. If not, start the right-click the **HotViewServer...** service line item and click **Start**.

3 SETUP RUN AS SERVICE IN HOTVIEW PRO

1. Open the **HotView Pro Launcher** and click **Server Configuration**
2. Click on **Windows Service** (in 10.4.0.0 or newer release, **Windows Service** is located under **HotView™ Management**), and then enter your username and password information as used by Windows.

IMPORTANT: The HotView Pro **Run as service** feature requires that a password is used when logging into Windows.

3. Click **Save** to exit the **Server Configuration** window.
4. Right-click the HotView Pro Launcher and click **Run as administrator**.
5. In the **HotView Pro Launcher**, click the box near **Run as service** and then click on **Server** to activate this feature.

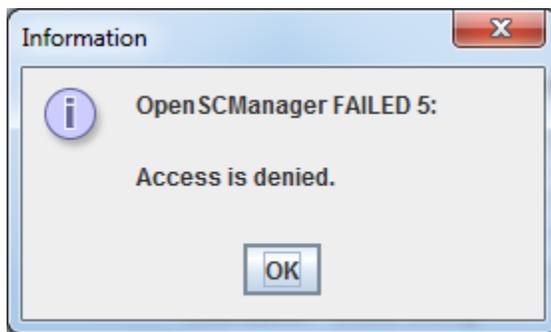

6. The HotView Pro server will now run as a service, which means that the HotView Pro Server will be **ON** regardless of which profile is being used.

4 TROUBLESHOOTING

Problem:

After enter the Windows password and clicking **Save**, the follow message appears:

OpenSCManager FAILED 5:
Access is denied.

Solution:

Right-click the HotView Pro Launcher and click **Run as administrator**.
Continue with Step 2 in Setup **Run As Service** in Hotview Pro
